

Advocacy alert

The US is not living up to our potential regarding the poor of the world in a number of major ways. Most of us know that we trail the rest of the industrialized world in the **amount** of aid we offer as a proportion of per capita income. There's more:

We also allow far too much of our aid to be **misdirected** in the form it takes, or by military and political concerns. U.S. aid is also **fragmented** into 31 different programs **uncoordinated** with one another, and **unaccountable** to any overall agency or plan to do the most good with our limited resources.

Urge your Senators to **co-sponsor** and work for passage of the Foreign Assistance Revitalization and Accountability Act (S.1524). Urge your representatives to do the same for H.R. 2139, the Initiating Foreign Assistance Reform Act.

S. 1524 and H.R. 2139 would move us toward making U.S. foreign aid far more **efficient, accountable, and organized** so that our \$ are better spent to help the world's poor and hungry – esp. urgent given the devastating impact of the economic crisis on the poor.

Contact your members of Congress today.

Start with your Senators as S 1524 is currently being considered by the Senate Foreign Relations Committee.

For more information, go to: www.bread.org,
www.one.org, www.globalactionforchildren.org

Thank you for helping hungry people!
